Before commencing a fitness programme, check with your doctor first if you are unfit, sedentary, overweight, obese, pregnant, or have any medical problem, diagnosed or otherwise, that may affect your ability to exercise such as: heart trouble, high blood pressure, diabetes, chest pain, especially when exerting yourself, feeling faint or dizzy spells, or any other medical condition which limits your ability to exercise.

We hope you obtain considerable enjoyment from these walks. At the time of preparation of the maps all routes follow rights of way or permitted paths, but diversion orders can be made and permissions withdrawn. Whilst every care has been taken to ensure the accuracy of the route description, HDC cannot accept responsibility for errors or omissions, or for changes in the details given. The countryside is not fixed. Hedges, footpaths and fences can be moved and redirected. Paths described may be pleasant for walking in fine weather but can become slippery, boggy and dangerous in wet and wintry weather. Wet weather can also cause some streams and rivers to become impassable. On days where visibility is impaired by cloud, mist, rain or fog, some landmarks used as direction aids in the route material may not be visible. ## Hazard

1. Take the path from the back of the car park. With the hut in front, the path verges to the left – BUT take the grass path on the right. Continue along this path, walking along the right hand perimeter of the woods.
2. As the path forks, take the right path. (the left is useful for winter when the wood is very muddy & slippery)
3. Continue along this path, walking at the back of the wood.
4. As the path forks, take the left grassy path. The path ahead will take you around the perimeter of the whole wood.
5. At the crossroads just continue straight ahead until you are back at the car park.

There are many paths within the wood – all suitable for short cuts or extensions. The paths in the middle of the wood are likely to be less slippery/muddy than the paths on the outside so I'd suggest using these when necessary.
